
Primus Reseach Programme

Since 2016 has Charles University announced [Primus Research Programme](#) for talented young researchers. This programme is particularly for those who are currently employed at the CU after a long internship abroad return, or those who would like to perform their research at CU. The programme aims to support the top researchers in the establishment and development of new scientific and research groups and laboratories. One of the long-term goals is to increase the success of the university in attracting international grants (e.g. Grants from the European Research Council - ERC).

Our PRIMUS projects:
