

Graduates of the study program of Teacher Training for Secondary Schools and Gymnasia receive the professional competencies that entitle them to teach at Secondary Schools and Gymnasia in the selected combination of two disciplines, and enable them to further develop professionally (including doctoral studies). Graduates can defend their approach to the world of art and to the creation of an image of the world from interpretive teaching positions.

The study program of General Education Teacher Training for General Schools, Secondary Schools and Gymnasia, and Basic Art Schools specialized in Art Education provides students with a comprehensive education ending with a Master's degree in the selected combination of two disciplines. The study of Art Education is based on fundamental and intertwining thematic areas of research, didactics and practice of Art Education and the application of their theoretical and artistic experience in future school practice
