
PHILOSOPHY of EDUCATION

Characteristics of the Studies

The doctoral studies are conceived as a preparatory programme for scholars and researchers whose creative endeavours contribute to the development of theory and research in the field of philosophy of education and similar social sciences related to philosophy. The programme aims preferably to enhance their relevant expertise, to disseminate relevant research findings and trends in the field of education and to cultivate methodological competences of doctoral students.

General focus of the study programme offers students the chance to get acquainted more deeply with the pedagogical disciplines. The focal point of the doctoral study is a doctoral dissertation/thesis, defined as an original scholarly work whose findings enrich the respective field of study within the broader context of developing the discipline.
